

Toe Tapper

While the arrival of beach season might feel like a dream come true, fungal toenails are a nightmare for the roughly 10 percent of Americans who suffer the embarrassing condition. **Dr. Emanuel M. Haber**, of the Paramus-based Foot & Ankle Centre of New Jersey, has used laser therapies to treat foot conditions for more than 20 years. And he recently became the first podiatrist in New Jersey to use the **NOVEON LASER**, a brand-new treatment for fungal toenail. Instead of the extreme heat of other lasers, the Noveon system uses infrared wavelengths to shut down fungal cells through a process called "photo-inactivation." The Foot & Ankle Centre is located at 30 West Century Road in Paramus. Visit bergenfootpain.com for more information.

Art for Gabriel

GALERIE GABRIEL, one of Englewood's newest art galleries, offers more than a showcase for modern art. It represents the memory of one little boy, Gabriel Kai Batista, who died in 2008 of complications related to his blood disorder. Gabriel was two weeks shy of 3 years old. His mother, Suzette, helped him draw pictures every day during his treatment, and when Gabriel died, his parents' passion for art deepened. Today, Galerie Gabriel offers an eclectic mix of art, primarily from Asia, Europe and Latin America, featuring oil on canvas, acrylic on canvas, lacquer on wood, screenprinting, mixed media, Chinese watercolor and serigraph. The gallery is located at 20 North Van Brunt St., Suite 7, in Englewood. Visit galeriegabriel.com for more information.
